

Filling out your load sheet will minimize mistakes and will help expedite your order.

When plotting your load:

3 – 24” bins fit in 1 pallet space

2 – 36” bins fit in 1 pallet space

Boxed items must be in separate pallet space- items can not be placed in same space as bins

Boxes per pallet vary on boxed items. See Packing Specification chart for boxes per pallet.

Corn Stalks cannot be placed on top of items, must be in separate pallet space.

If trailer length is:

48’ there are 22 pallet spaces

53” there are 24 pallet spaces

If unsure of trailer length, place items in tail you can afford to be short on, if truck is only 48’.

See sample order / load sheet
